I am accustomed to working well with a diverse team, respectful to other people's ideas, self-motivated, and a gifted software developer focused on learning new technologies and finding creative ways to solve problems, I am currently taking software development in my final year at KCA University. I am an integral person with an ability to function well independently.

EDUCATION

Software engineering
KCA UNIVERSITY

05/2018 - Present   *Nairobi, Kenya*

PERSONAL PROJECTS

Loan prediction using machine learning (05/2020 - Present)
- The idea behind this ML project is to build a model that will classify how much loan the user can take.
- It is based on the user's marital status, education, number of dependents, and employments.

Stock price prediction using machine learning (05/2019 - Present)
- Predict the future price of the stock market based on the previous year's data.

E-Auction web application using react (05/2020 - Present)
- UI design
- Database design

WORK EXPERIENCE

Software engineering intern
Open Genus Foundation

09/2021 - Present

Achievements/Tasks
- Learnt new technologies.
- Wrote articles.
- Learnt different data structures and algorithms.

SKILLS

Web development with JS (react)   Node.js   Python

Machine learning

Database development with a variety of tools and technologies

OOP with Java

Computer Science principles including data structures and algorithms

ACHIEVEMENTS

Participation in Google Africa Developer scholarship (03/2019 - Present)
In the past few years (from 2018), I have Participated in Google's Africa Developer Scholarship Mentorship program in the development and implementation of mobile web-based solutions and Android development.

CERTIFICATES

Learn Python 2 Course (01/2019 - 05/2019)

Learn the Basics of Blockchain with Python Course (02/2019 - 06/2019)

LANGUAGES

English
Full Professional Proficiency

Swahili
Native or Bilingual Proficiency

INTERESTS

Attending developer meetups

Learning new tools and technologies
